

Lightweights

Bowater offers light basis weight papers in both our coated mechanical #5 and supercalendered (SCB+) lines that will help you take a load off your bulk weight mailings. Lower your postage and distribution costs – without sacrificing paper quality or bulk.

BowGloss, Bowater's workhorse coated mechanical #5 grade, includes high bulk 32# and 34# basis weight papers that are well suited for magazines, catalogs, direct mail, and other applications. BowGloss 32# and 34# sheets have been tested in an assortment of offset pressrooms and consistently experience excellent runnability and printability.

In addition, our BowSCB+ line includes 26#, 28# and 30# basis weight papers. These sheets, with their excellent bulking characteristics, are also perfect for any postage-dependent application. BowSCB+ exhibits outstanding print results especially for retail inserts, direct mail, and catalogs.

	COATED MECHANICAL #5		SUPERCALENDERED
